ground in the city for the purpose of growing garden truck for market and thus reduce the cost of living. The scheme originated with Mrs. Ora M. Brashere, a former newspaper who is now a resident here.

There is a move on foot in Salt Lake

The proposition is to utilize the va-ant ground upon the benches and in the suburbs which have been bought upon the installment plan and utilize these grounds for quick-growing crops as the utilization for this purpose would not injure the preperty, but would in cality be a benefit to it.

To Form Company.

Plans proposed and which have been abmitted to a number of business and real estate men are to form a company with sufficient capital to employ men to sow and till the soil on the vast acreage about the city which is now dle and producing nothing and con-cert it into a great garden, the product of which would be sold to Salt Lakers a fair percentage above cost.

Promoters of the scheme believe that from the scale me believe that 500 heres of ground can be procured for this purpose, and as the tillage of the ground would improve it rather than be a detriment, it is believed that the acreage can be secured at a nominal rental.

Is Philanthropic Scheme,

Of course, while the scheme is a monov-making one, it really is a philanthropic move, as the intention is to
figure upon a nominal profit only and
give the consumer the benefit of the
reduced cost in the growing of crops.

The promoters believe that if the
Retail Merchanis' association will take
the matter up that the cost of living
could be very largely reduced and still
leave the dealer a greater profit than
he now receives. Should the retailers
decline to handle the truck, then there he now receives. Should the t decline to handle the truck, the would be opportunity to expand the idea and put in a big establishment where people could buy provisions at the min-imum cost and deliver the goods them-

Several attempts have heretofore bee made to do something of this kind, but the promoters of the present scheme believe that their plan is upon a bread er scope than the others, and that not only will it prove to be a paying in-vestment, but also all Salt Lakers will reward in reduced prices for garden truck.

Successful Elsewhere.

The scheme, it is said, is being worked successfully in other cities. It will give opportunity to employ a large number of idle men and would thus prove blessing in more ways than one The question, it is said, has been broached to a number of business men and also a number of real estate dealers and owners, all of whom declare We desire to express our heartfeit thanks to our many friends who so kindly assisted in our recent bereavement.
